

CAR & GENERAL (KENYA) PLC

SUMMARY CONSOLIDATED AUDITED FINANCIAL STATEMENTS
FOR THE PERIOD ENDED 31 DECEMBER 2025

COMMENTARY TO THE RESULTS

The twelve-month period from 1 January 2025 to 31 December 2025 was positive with all markets showing signs of recovery. In Kenya, specifically, the boda boda business resumed growth to a monthly average of 8,000 units from a low of 4,600 units per month in 2024. This led to recovery in growth of our Kenya business after two years of decline. In addition, we saw reasonable growth in all product lines and territories.

The Group reported a 21% increase in turnover compared to the prior year. Sales in Uganda and Tanzania now represent over 56% of Group sales.

As a result of the above, turnover for the twelve-month period ended 31 December 2025 was Shs 25 billion against Shs 21 billion achieved in the year ending 31 December 2024. EBITDA (Earnings before interest, tax, depreciation and amortization) was Ksh 3.8 billion compared to Ksh 1.5 billion in the prior year representing growth of 153%. The Group made a profit after tax of Ksh 2.4 billion against a profit after tax of Ksh 526 million made during the previous financial year.

There are notable achievements.

- Our consumer business growth in Kenya particularly in the two-wheeler segment.
- The performance of our Tanzania businesses including distribution and poultry.

- The progress of Watu Simu across Africa.
- The working capital rationalization across the Group.
- Our commitment to the transition to greener energy is taking shape and through our associates, we have successfully embedded electric 2 wheelers in Uganda and Kenya using over 350 battery swap facilities accessible to the Group through its investment in Watu and Arc Ride. Watu is the largest financier of electric vehicles which helps drive this adoption.

Going forward, we believe uncertainty will persist in 2026. We do, however, expect less turbulence in East Africa subject to the continued availability of fuel. Key to success will be maintaining strict fundamentals in terms of higher efficiency levels in all areas of our business, maintaining market share in core products and achieving satisfactory profitability across all businesses. We have made all necessary manpower and infrastructure investments, including digital, and we now need to drive volumes further, improve efficiencies and increase margin to ensure profitability given the uncertain operating environment.

We now have a more balanced business with five distinct business lines being automotive and equipment distribution, real estate investment, financial services, poultry and helmet manufacturing. This diversity coupled with geographical reach builds sustainability, and we are confident that each line offers scope for growth.

Going forward, we are well positioned to deliver on our Triple P bottom line – People, Planet and Profit. We are already having a significant impact on millions of lives in terms of delivering daily livelihoods and entrepreneurship opportunities. We will now continue to focus energy on electric and Compressed Natural Gas (CNG) vehicles in Tanzania. With our symbiotic relationship with Watu, we can play a significant role in transforming the 2-wheeler and 3-wheeler market towards electric and compressed natural gas. This will play a positive role in reducing our carbon footprint over the coming years. We will also continue to drive smartphone connectivity across the continent. This significantly improves livelihoods.

Subsequent to the reporting date, geopolitical tensions arising from the conflicts in Iran resulted in disruption to some global supply chains, including intermittent delays of logistics and volatility in oil prices which could have potential impact on the Group’s operations in future. Following the announcement of a ceasefire on 7 April 2026, the Group expects conditions to stabilize, although uncertainty remains. The Group has not experienced any significant disruptions to its operations to date.

The current financial year will be critical to future success and will require a growth in market share in all sectors. Our primary concern is to ensure that we stay ahead of competition in our key markets in all respects. The quality of competition is increasing.

Dividend

Given the performance during the financial period and the need for investment throughout the business, the Directors do recommend a final dividend of Shs. 250,000,000 which is equal to Shs. 3.12 per share (2024: Shs. 0.80), in addition to the interim dividend of Shs 24,062,000 (Shs 0.30) paid during the year. The Dividend shall be payable to those registered at the close of business on Wednesday 24 June 2026. Subject to approval by the shareholders, the dividend is to be paid on or about 30 June 2026.
