COMMENTARY

Performance

In 2025 the Company produced 3,753,340 (2024 – 3,731,600) kilograms of green tea leaf, which in turn was manufactured into 849,848 (2024 – 811,200) kilograms of black tea. Green tea leaf and black tea increased by 1% and 5% respectively in 2025.

The turnover decreased by 9% to KShs 131 million in 2025 from KShs 144 million in 2024. The decline was driven by reduced market prices.

The Company posted a pre-tax loss of KShs 50 million in the year ended 31 December 2025 compared to a KShs 10.6 million pre-tax loss in the prior year. The decline in performance was largely driven by rising labour cost and adverse market conditions where Kenya's tea auction prices, as reflected at the Mombasa Tea Auction, declined between 2024 and 2025 due to an overall reduction in the global demand compared to elevated stock levels in the Kenyan market.

Dividend

The Directors do not recommend the payment of a dividend for the year ended 31 December 2025

Prospects

Operation cost driven by rising labour costs has pushed the cost of production upward. Market prices declined contrary to expectation, driven by reduced demand in key tea markets.

Management will continue to implement cost containment measures and quality improvement initiatives to support resilience and ensure the company delivers steady performance despite prevailing market pressures.

Ms. Dorcas Muli

CHAIRPERSON

22nd APRIL 2026
