Results for the six months ended 31 January 2026

The Board of Directors of Carbacid Investments plc is pleased to announce the unaudited half-year results for the six months ended 31 January 2026.

Turnover for the 6 months grew by 4% attributed to market growth in the East African markets. The Southern Africa market has experienced a subdued demand due to seasonal patterns and increased local supplies.

Gross margin dropped by 1% to 64% due to the sales mix in the first half of the year.

Administration costs increased by 15% driven by Carbacid's deliberate decisions to align with the strategy around customer retention and the need to support the long-term strategy enablers.

Borrowing costs reduced as the business continued repayment of debt that had been acquired to finance investments in plant and logistics. Profit after tax increased by 7% compared to the same period last year, driven by revaluation gains on equity investments. Interest rates have continued to decline in the period, thus impacting on the earnings of the investments in bonds and deposits.

The markets that Carbacid serves have seen new entrants coming in and Management is addressing the resulting challenges by enhanced customer experience and delivery commitment. The Board continues to look at options to grow the business in new areas and to increase shareholders' value.

Dividend

A final dividend will be considered based on full year results.

By Order of the Board,

Conrad Nyukuri,
Secretary,

25-Feb-26
