Message from the Board of Directors

The directors are pleased to announce the unaudited Group and Company results for the six months ended 30 June 2026.

Business performance

The Group delivered resilient operational performance during the first half of 2026, with a significant increase in the Insurance Service Result compared to the corresponding period in 2025. The result reflects continued momentum across both the Life and General Insurance businesses and demonstrates the strength of the Group's diversified business model. The Group also maintained disciplined cost management. However, the General Insurance business continues to experience elevated claims experience.

Investments held are a significant contributor to group earnings and income unfortunately declined during the period mainly because of the lower interest rate environment that has manifested in reduced net yields. This has resulted in basic earnings per share from continuing operations of KShs 0.43 compared to KShs 0.80 in the corresponding period in 2025. Despite the lower earnings reported for the period, the Group remains financially resilient and well capitalised with capital levels above regulatory requirements.

Strategic highlights

The Group continues to strengthen its customer value proposition through product innovation and market-led solutions. During the period, The Group launched **HeriAfya Seniors** and **HeriAfya Juniors** to complement the already successful **HeriAfya** medical retail offering. In addition, the **LifeVest** investment solution was enhanced to integrate long-term wealth creation with expanded insurance protection, including critical illness and permanent total disability benefits.

To better serve our customers, the Group is currently undergoing a systems migration to provide them with the latest tools and technologies. As a result, operating expenses are higher than last year, reflecting this one-off investment.

Prospects

Kenya's macroeconomic environment continued to improve during the period, supported by a stable exchange rate, accommodative monetary policy, and positive economic growth expectations. While this provides a favourable backdrop for business growth, fiscal consolidation pressures, constrained household disposable incomes, elevated public debt, and climate- and geopolitical-related risks continue to present risk and uncertainty.

The Group's diversified business portfolio, prudent underwriting practices, disciplined cost management, and strong capital position continue to provide a solid foundation for sustainable long-term value creation.

Interim dividend

The Directors have not recommended an interim dividend.
