COMMENTARY FOR THE YEAR ENDED 30TH SEPTEMBER 2025

The Group achieved a return to profitability for the financial year ended 30th September 2025, successfully reversing the prior year's downturn. Despite a challenging global and domestic economic environment, the Group recorded a Profit After Tax of KShs. 188.01 million, a substantial recovery from the KShs. 562.9 million loss in 2024. The results were driven primarily by a record performance in our coffee business which made up for challenges in our Avocado and Tea divisions

Key Financial Metrics:

- Turnover: Increased by 22.4% to KShs. 8.44 billion (2024: KShs. 6.89 billion).
- Cost of Sales: Rose at a slower rate than revenue by 17.9% to KShs. 7.43 billion, driven mainly by economic pressures and logistics costs.
- Operating Profit: KShs. 35.5 million (recovering from a KShs. 374.9 million loss in the prior year).
- Biological Assets: A fair value gain of KShs. 156.54 million significantly bolstered the bottom line due to impact of the lower interest rate and higher coffee prices in the global commodity market.

Operational Performance by Business Unit

While the Group's diversified portfolio provided resilience, performance varied across segments due to climatic, economic and geopolitical headwinds.

Coffee: The Growth Engine

The Coffee Trading unit was the standout performer, achieving its highest ever profits. Despite a decline in the production volumes in coffee estates due to adverse weather, price realizations at the Nairobi Coffee Exchange were exceptional, averaging \$6.19/Kg. (\$4.65/Kg. in 2024).

Tea: Market Depression

Tea operations faced a protracted market depression, caused by a global tea glut from major producing regions. Revenue declined as sales volumes fell; however, the unit mitigated losses through continued use of mechanization and automation, renewable energy contribution, and interest income from cash reserves.

Avocado and Macadamia: Logistics and Supply Challenges

- Avocado: This was severely impacted by the Suez Canal closure and the continuation of the Middle East geopolitical conflicts. Shipping volumes dropped significantly as inability to move goods through the Suez Canal compromised access to European markets, our traditional stronghold for the fruit business.

- Macadamia: The unit achieved a higher average price of \$11.33/Kg. (2024: \$7.78/Kg.) for the nuts we processed for export. Despite the supply of raw nuts in shell (NIS) being limited, and drastically limiting availability of raw material for processing.

Strategic Developments and Sustainability

The Group is actively restructuring to enhance shareholder value and operational efficiency:

- Asset Disposal: the group earmarked one of the coffee divisions with a carrying amount of KShs. 3.7 billion for disposal. These assets are now classified as "held for sale."
- Digital Transformation: The Group successfully implemented the ERP transition from our legacy ERP to Sage X3., which will streamline financial reporting and operational oversight.
- Sustainability & ESG: We remain committed to enhancing our contribution towards a better world. Our strategy emphasizes climate-resilient agriculture and people centric policies and practices towards a sustainable future.

Liquidity and Future Outlook

The Group maintains a stable liquidity position, closing the year with KShs. 665.05 million in cash, deposits and other investments. We have strategically allocated funds into infrastructure bonds and fixed deposits to ensure a steady yield on cash reserves.

Looking ahead to 20
